Empowerment for Inclusion

Applicant: Asociación Iniciativa Internacional Joven

“**Empowerment for Inclusion**” is a KA1 project with two different activities:

- Mobility of Youth Workers: Training Course (A1)
- Short-term EVS mobilities (A2)

The main aim of the project is to exchange our tools and methodologies for creating a common learning process and management process of EVS projects, especially those that are focused on young people with fewer opportunities. Afterwards, we will use the exchanged and created tools during a short-term EVS where all partner organisations will send to Iniciativa Internacional Joven one volunteer.

The main **objectives** of the project are:

- To improve key competences of participants for their personal and professional development;
- To exchange good practices and methodologies among organizations for sending, hosting and coordinating EVS projects with volunteers with fewer opportunities;
- To create and put into practice new educational tools for improving the quality of EVS projects with young people with fewer opportunities;
- To increase the commitment of the participating organizations in sending and/or hosting volunteers with fewer opportunities;
- To create a stable network of organizations that use similar tools and methodologies for sending and receiving volunteers with fewer opportunities;
- To promote the participation of young people with fewer opportunities in educational and international mobility programmes.

Once the project has been completed we expect that a better-quality and more efficient work in all aspects related to sending, hosting and coordinating EVS (now: Volunteerings) projects where participants are young people with fewer opportunities. We hope that their participation and preparation will increase and they can take the most possible advantage from this learning experience.
